About Inventionland® Education

At Inventionland® Education, we transform classrooms and underutilized spaces into **immersive learning environments** that inspire creativity and innovation.

We believe that every person is born with the potential to be brilliant; they just need the environment, guidance, and mindset to succeed. That's what we help to bring to PreK-12 schools every single day.

Inventionland started as a design-for-hire company, and now we're one of the largest private invention factories in the world. We started Inventionland Education after several districts and schools toured our headquarters in Pittsburgh and asked that we help them create the same inspiring environments that have us named as one of the most creative places to work in America. When you walk into one of our Innovation Labs, you'll immediately see our impact on students and educators. Our age-appropriate spaces are like nothing you've seen before.

Why Innovation Labs®?

Have you ever wondered why leading companies like Apple, Disney, Google, Facebook, and Inventionland have such unique, immersive environments to work and create? It's because these environments are proven to cultivate creativity, problem-solving, and original thought, three crucial ingredients to innovation.

Inventionland Education is committed to bringing this powerful innovation ideology to schools to help cultivate, inspire, and motivate our next generation of student creators through our Innovation Labs. Here, students are encouraged to take risks, challenge their beliefs, and think critically.

American ingenuity and innovation have defined our history – whether it was the first race to the moon, the space shuttle, or future missions to Mars. And we want to foster the next generation of innovators.

When students can express themselves in a creative setting, they can better develop their ideas, insights, and learning in a completely new way.

We're here to help change the world of education for the better, and we're glad you're part of it.

“It’s hard to be creative when you sit in a beige box all day long.”
John Stoddard
Superintendent, Berkshire Local Schools

“Every child will have the opportunity to work in the space, to create, to innovate, and to be leaders moving forward.”
Dr. Sean McCarty, Asst. Superintendent,
Seneca Valley School District

Educators React to our Innovation Labs®

“This space helps increase student engagement and teacher engagement, because when you walk in here it is a beautiful space that allows students to think outside of the box, and that kind of thinking is encouraged in this environment.”

Nanette Farmer, Principal,
Rowan Elementary, SVSD

“Inventionland worked within our budget, worked with our design, especially worked with our teachers, so the teachers got what they wanted.”

Dr. Tiffany Nix, Superintendent,
Leechburg Area School District

“We are very excited about providing an innovative space and how it will shape the future for our children. This is on the cutting edge of an immersive experience in education.”

Dr. Sean McCarty,
Asst. Superintendent,
Seneca Valley School District

“I hear teacher after teacher, when they come into this space say, ‘Man, I wish I had this when I was in school,’ and that just speaks volumes about how this space emotionally affects people to do things that are different, and that’s what this is all about.”

Dr. Thomie Timmons,
Former Innovation Coordinator,
Hannah Ashton Middle School

“Children learn in an environment that is creative, colorful, inviting, warm, and safe, and that’s what we’ve provided them.”

Ms. DeeAnn Graham,
Principal, Connoquenessing Valley
Elementary School
