

# INVENTIONLAND<sup>®</sup>

## Educator Resources for Teaching 21st Century Skills

Inventionland, the world's largest private invention factory, provides courses, lesson plans, teaching aids and student kits to integrate real-world inventing techniques into your classroom.

***You know education, we know  
inventing. Together, we can broaden  
the minds of tomorrow.***

# InventingCourse

**Thinking of integrating innovation into your classroom?** Experience real world inventing, innovation and entrepreneurship. Students build career-ready skills. They bring their ideas to life. Whether it's learning how to use observational skills to identify opportunities, how to develop ideas, research the viability of that idea, how to design and make the idea, package and present it. Students are taught how to create their own products and pitch them... think Shark Tank.

***Meets Standards***

**Inventionland<sup>®</sup>**  
**provides everything**

# Teacher**Training**

**Get hands-on, in depth and professional training!** As students go through the course, they are exposed to real world jobs. During the inventing, making and storytelling process, each student draws upon their own inner desire to make their contribution to the project. Whether the students discover a career direction or seek to become one of tomorrow's entrepreneurs, their eyes will be opened to a world of new possibilities.

***Get Certified***

**g you need to teach innovation!**

# TeacherResources

**All the tools you need to build career-ready and life-ready skills!** Environment means something. These teacher resources are designed to help innovate the environment in any classroom or makerspace. Our resources come in three basic groups (by design) that flow with the Inventionland Inventing Course. The three basic groups are Inventing, Making and Storytelling.
